

SPECIFICATION

Please amend the specification at page 14, lines 5-18, where underlines denote insertions and strikethroughs denote deletions:

The following describes the preferred embodiments of a nozzle and iodine injection system and their methods of use according to the present invention by reference to FIGURES 1-7. ~~Although the preferred embodiments of the present invention are described, the description is not intended to limit the scope of the invention as defined by the claims.~~ Some details of the COIL, nozzle, iodine supply system and SOG and their methods of use, including various gauges, fittings, piping, etc. are well known in the art, and as such are neither shown nor described. Even though numerous characteristics and advantages of the present invention are shown and described in the drawings and accompanying text, the description is illustrative only, and changes may be made, especially in matters of arrangement, shape and size of the parts, within the scope of the invention to the full extent indicated by the broad general meaning of the terms used in the claims.

Below is a clean version of the paragraph amended above:

The following describes the preferred embodiments of a nozzle and iodine injection system and their methods of use according to the present invention by reference to FIGURES 1-7. Some details of the COIL, nozzle, iodine supply system and SOG and their methods of use, including various gauges, fittings, piping, etc. are well known in the art, and as such are neither shown nor described. Even though numerous characteristics and advantages of the present invention are shown and described in the drawings and accompanying text, the description is illustrative only, and changes may be made, especially in matters of arrangement, shape and size of the parts, within the scope of the invention to the full extent indicated by the broad general meaning of the terms used in the claims.
